
ABBIE WHITE
Human + AI for Sales,
GTM, & Growth Keynote Speaker.
Creator of The Growth Paradox.
ABBIE-WHITE.COM

When you book Abbie, you get more than a keynote.

Abbie delivers revenue growth for businesses embracing the Human + AI age, measured in record-breaking months post-session.

One AI workflow that previously took weeks now runs in under an hour. Another client achieved **$9 Million** net new pipeline in 30 days. Brands she has worked with have achieved over 2000% ROI on lead generation campaigns. **Her clients leave more than energised; they leave executing.**

Abbie White is a keynote speaker, growth strategist, and executive advisor navigating the line between AI acceleration and human advantage for revenue teams.

Working with businesses every week, she sees the patterns of where the **growth opportunities** and risks are across the revenue and partner ecosystem — a rare, real-time view she brings to every client. **Everything you hear on stage has been tested in today's market.**

Her signature keynote, **The Growth Paradox: Human + AI,** challenges teams to identify which growth lever to pull (AI or human advantage) and when. Because in the right context, each accelerates revenue, but in the wrong one, each can be damaging.

Abbie is trusted by **ASX 200 and Fortune 500 brands** including HPE, Qantas, Fortinet, Commonwealth Bank of Australia, Deloitte Digital, and Telstra.

Abbie's Keynote Topics

All topics can be delivered as a keynote or workshop, fully customised for your audience, your industry and your priorities.

1 The Growth Paradox: Human + AI

SIGNATURE KEYNOTE

AI and human advantage are both growth levers. Both can accelerate your revenue… *and* both can damage it. The difference is knowing which one to pull, and when.

Here is the paradox: If we don't lean into AI, we risk falling behind competitors who are already going AI-native. However, using AI where we shouldn't can be brand-damaging and risks losing the human connection that drives loyalty.

The organisations winning right now are the ones who know how to rethink, adapt and execute to seize growth opportunities when everything keeps changing at speed.

- **Rethink, unlearn.** Challenge assumptions, let go of what no longer works.
- **Think like a scientist.** Test, iterate and experiment at speed.
- **Adapt.** Gain the advantage, before others move.
- **Execute.** Develop the habits that drive execution amongst the noise.

KEY TAKEAWAYS:

See exactly where AI accelerates revenue in your sales journey, and where human advantage wins the client.

AI influences whether you get shortlisted or win the tender. Understand how the AI-enabled buyer has changed.

Turn the keynote into growth with a 30-Day Execution Challenge that keeps the team executing after the event.

2 The Leadership Rethink: Human + AI for Growth

You've bought the AI licences.
Now lead the rethink that puts your business ahead on growth.

AI has changed how buyers choose, how teams work and how fast markets move. The sales and GTM teams pulling ahead are the ones rethinking how they operate as Human + AI.

- **Rethink the model.** Pin down what AI has already changed in how your teams win business, and what it never should.
- **Disruption comes quick.** Understand the macro trends influencing business and the perfect storm which is upon us.
- **Decide what stays human.** Get clear on where human judgement, trust and relationships are non-negotiable.
- **Leadership in the AI era.** Understand how to lead your team to turn AI into revenue.
- **Getting an ROI on AI.** Learn how high-performance teams get an ROI on AI and how to measure real AI success.

Abbie brings both sides of the rethink: the commercial case from leading a $100M portfolio at IBM, and the human side from her positive psychology and emotional intelligence credentials, both put to work every week inside sales & GTM teams.

KEY TAKEAWAYS:

Identify where to rethink your approach and likewise what to protect at all costs.

How to effectively lead your teams for growth during the Human + AI era.

A 30-Day Execution Challenge that gets leaders and teams executing immediately.

3 The Winning Habits of High-Performance Sales Teams

What the top 1% do consistently, not just "when they have time," to keep performing in a tough market.

LinkedIn and Ipsos studied 2,000+ B2B sellers and found **three habits** linked to beating quota.

In this keynote, Abbie shares those habits and adds her own proven methods, which one client credits with their **highest month on record,** in a tough market. Most of her clients still use these habits and execution strategies years later.

Many sellers have never had to perform in a market like this. With the chance of recession rising, the teams that win know how to keep their habits under pressure and perform without burning out.

- **The three high-performance habits.** The research-backed habits linked to beating quota, and how to make them stick even when the team is flat out.
- **Building pipeline in a tough market.** Prospecting habits that keep pipeline moving when buyers go quiet.
- **Habits that count in the AI era.** How to power high-performance habits with Human + AI so sellers spend more time with clients.
- **Execution under pressure.** Agree on non-negotiables as a team so performance holds all year.
- **Standing out in a noisy market.** How to differentiate and hold buyers' attention when every competitor sounds the same.

KEY TAKEAWAYS:

The habits that matter most in a tough market.

How to execute through the noise and perform under pressure without burning out.

A 30-Day Execution Challenge that delivers the results.

“An exceptional speaker who delivers. Abbie's energy is infectious, keeping everyone engaged. Her keynote was packed with insights that attendees could immediately implement. One salesperson with 20+ years of experience called it the best session of its kind he had attended.”

FORTINET

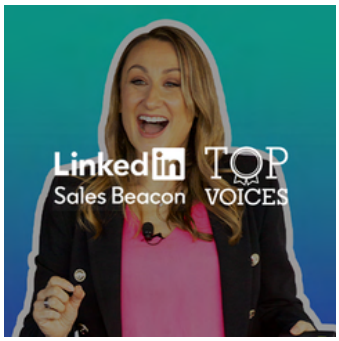

“Abbie’s session seamlessly connected AI, business growth and today's evolving consumer. She was exceptionally prepared and engaging, with clear takeaways that resonated with our audience.”
